

38. Which of the following nerves passes through the jugular foramen?
39. Which of the following nerves passes through the internal acoustic meatus?
40. Which of the following nerves passes through the optic canal?
41. Which of the following nerves passes through the hypoglossal canal?
42. From which of the following structures does the accessory nerve exit?
43. From which of the following structures does the vestibulocochlear nerve exit?
44. From which of the following structures does the facial nerve exit?
45. From which of the following structures does the ophthalmic nerve exit?
46. From which of the following structures does the optic nerve exit?
47. Which of the following arteries is a terminal branch of the basilar artery?
48. The anterior communicating artery is an unpaired connection between which of the following arteries?
49. The posterior communicating artery is a connection between which of the following arteries?
50. The anterior cerebral artery is a branch of which of the following arteries?
51. The middle cerebral artery is a branch of which of the following arteries?
52. The posterior inferior cerebellar artery is a branch of which of the following arteries?
53. The anterior inferior cerebellar artery is a branch of which of the following arteries?
54. The vertebral artery is a branch of which of the following arteries?
55. The superior cerebellar artery is a branch of which of the following arteries?
56. Which of the following arteries are the main tributaries of the cerebrum?
57. The ophthalmic artery is a branch of which of the following arteries?
58. Into which of the following veins does the transverse sinus empty?
59. Which of the following sinuses empties into the straight sinus?
60. The axillary artery is a continuation of which of the following arteries?
61. The brachial artery is a continuation of which of the following arteries?
62. What is the border between the subclavian and axillary arteries?
63. What is the border between the axillary and brachial arteries?
64. Which of the following muscles divides the axillary artery into three distinct parts?
65. Which of the following arteries is a terminal branch of the brachial artery?
66. The superior thoracic artery is a branch of which of the following arteries?
67. The thoracoacromial artery is a branch of which of the following arteries?
68. The lateral thoracic artery is a branch of which of the following arteries?
69. The subscapular artery is a branch of which of the following arteries?
70. The deep brachial artery is a branch of which of the following arteries?
71. The superior ulnar collateral artery is a branch of which of the following arteries?
72. The radial collateral artery is a branch of which of the following arteries?
73. The recurrent radial artery is a branch of which of the following arteries?
74. The anterior ulnar recurrent artery is a branch of which of the following arteries?
75. The common interosseous artery is a branch of which of the following arteries?
76. The superficial palmar arch is the main termination of which of the following arteries?
77. The deep palmar arch is the main termination of which of the following arteries?
78. Which of the following veins is a superficial vein of the upper limb?
79. Which of the following veins is a superficial vein of the upper limb?
80. Which of the following veins connects the superior vena cava and the inferior vena cava?
81. Which of the following veins empties into the azygos vein?
82. The superior phrenic artery is a branch of which of the following arteries?
