Portfolio

Hello everyone!
I'm **Elmira Midinova,**
I'm Senior Lecturer of Medical biology,
genetics, parasitology at IMF OshSU for 9
years.
Graduated from the Kyrgyz State
National University named after
   J. Balasagyn (Bishkek)(Master degree)

Currently, working on the PhD. Research

Being an ambassador of **STEM approach** on 2021-2022

- I am interested in science-based learning, project-based learning, using inquiry methods, soft skills, over all student-centered learning, that's how I use the tools, methods, and experience to aid learners as Kit (Performance), Gamification (Mafia, Among Us, Fire…), Projects, Tik Tok, Video, Checha-Kucha and many more….

Achievements of my students

- Every semester, <u>Olympiads</u> are held in the discipline. students take an active part and those who receive prizes are rewarded with additional points

- **My students team won the 1st place (Gran-Pri) in the Republican Medical Parasitology Olympiad on October, 2019.**

- My students won the **1st place**

in the **International Medical biology**

Olympiad on May 2021

Organizing Olympiads, scientific conference to students!

Visiting rehabilitation center for disabled kids with my kuratorial group

With exchange Program "Mevlana" **Turkey, Namik Kemal University** and **Bulent Ecevit Universities**

Course and Lesson Planning

"Tell me and I forget, teach me and I may remember, involve me and I learn."
- Benjamin Franklin

- When I first started as an instructor in fall 2014, I developed my syllabus and notes based on Kyrgyzstan's University and other country. Over the last few years, I've made adjustments to the course structure based on trial and error and student feedback.

Playing Kahoot with students!

P.S. about me…

- Love to read and watch biographic books and movies as you can touch a history, to learn through them some one's experience.
