INTERNATIONAL MEDICAL FACULTY

“Approved”

at a meeting of the department

minute. No. 4 from “20” 11 2022

HOD, Associate Professor, R. A. Ysmailova

DEPARTMENT OF SOCIAL - HUMANITARIAN DISCIPLINES

WORK PLAN OF THE STUDENT CIRCLE

ON THE SUBJECT PHILOSOPHY

for 2022-2023-academic year

TITLE: "Philosophy and Methodology of Medicine"

SUPERVISOR: Candidate of Philosophical Sciences, Associate Professor Ysmailova R.A.

PARTICIPANTS: 1st year students

Relevance of the discussion.

At present, modern medicine requires constant understanding of the problems that arise on the way to building a healthy society in the state. Students of the Faculty of Medicine express great interest in researching various problems in the medical field. This is evidence that students' interest in writing research-oriented papers allows them to identify a number of problems in medicine and to know the true existing adversity.

Students interested in scientific research in the field of philosophy of medicine and global problems of our time are invited to participate in the circle.

WORK PLAN OF THE CIRCLE

	Timing	Subject	Organizers

**Thematic planning for Russian Language
«Russian language in medicine»**

**for 2022-2023 academic year
Direction: 560001- General Medicine (GM)**

Explanatory note

This thematic planning "Russian language and medicine" has designed for foreign students. In the extra curriculum work, special paid attention to work on lexical material, since it has aimed at mastering lexical units as units of communication associated with all speech areas of the future profession of students.

The main goal of this elective is to develop students' practical skills in using the Russian language for professional communication in the field of medicine, as well as a tool for obtaining new knowledge in the field of medicine.

Task of extra curriculum work:

- to develop the communicative and socio-cultural competence of students;
- improve students' skills in four types of speech activity, as - in the field of speaking - to form dialogue skills in the process of professional communication; in the field of writing - to teach how to fill medical records using medical terms and abbreviations; in the field of listening - to improve the ability to listen to small texts related to medical topics with an understanding of the general idea, and with the extraction of the required information; in the field of reading - to improve the ability to read adapted and authentic texts on medical topics with an understanding of the general idea, and with the extraction of the required information;
- expand the range of background knowledge about medicine, its specifics.

As a result of passing the extra curriculum work of students:

- master the vocabulary in accordance with the topics of medical communications;
- improve their skills in four types of speech activities;
- learn how to fill out medical documentation in the conditions of internship, using medical terms and abbreviations.

Structure of extra curriculum work of students':

- designed for 1, 2 semester for everyone;
- total number of hours - 24;
- number of lessons per week - 1;
- Classes can be conducted online and offline.
