

Protocol No. 2

06/10/2023

Osh, IMF 2

Curator-Manas kyzy Myrzaiym

Curatorial hour on the topic: " Mandatory medical insurance"

Curator:

On the basis of the order of the Ministry of Education and Science No. 2146/1 (02.05.2023) "On the execution of a regulatory legal act", the protocol of the authorized representative of the President in the Osh region dated May 2, 2023 No. 44-15, as well as on the basis of the report of the head of the Department for work with foreign citizens and consular services assoc.M.Amiralieva on " Mandatory medical insurance(MMI)".

Where can I purchase an MMI policy for Kyrgyz citizens and for foreign citizens?

You can purchase it in the territorial division of the MMIF (Mandatory Medical Insurance Fund) at the place of residence. You can find out the address by calling 113.

Provide a passport (ID card) - for Kyrgyz citizens; passport, residence permit - for foreign citizens and stateless persons.

What does the MMI policy guarantee?

- The right to a free basic package of medical services;
- access to preferential medicines;
- the amount of co-payment for hospitalization is reduced.

What kind of help does it include?

At the outpatient level, a free basic package of medical services is provided to the entire assigned population:

- admission;
- consultation;
- 11 types of tests (general blood analysis; general urine analysis and urinary sediment microscopy; urethral smear microscopy; vaginal smear microscopy; sputum analysis (smear microscopy); blood sugar determination; urine sugar determination; blood cholesterol determination; electrocardiogram; determination of glycated hemoglobin in the blood (patients with diabetes mellitus - once a year); urine analysis for bacteriuria by Gram staining (for women in the first trimester of pregnancy);
- emergency assistance, etc.

The MMIF also provides an opportunity for all assigned residents to undergo a preventive examination and identify at an early stage:

- diseases of the cardiovascular system, for example, hypertension leading to stroke, heart attack;

- diabetes mellitus, complications of which lead to blindness, kidney failure;
- anemia in children, women;
- oncological diseases;
- blood diseases;
- lung diseases;
- tuberculosis and much more.

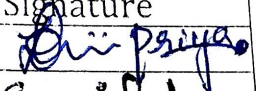

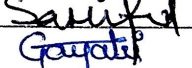

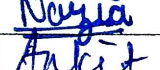

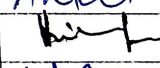

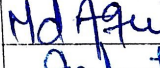

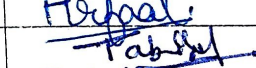

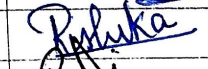

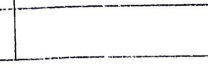

At the stationary level:

Provides free emergency care to patients before they come out of critical condition. During planned hospitalization, the hospital provides patients with a package of medical services (treatment, according to clinical protocols, including surgery, anesthesia), provides medicines, medical products within the hospital list from the list of vital medicines, procedures, etc.

We notify students of the International Medical Faculty of OSH State University about the mandatory medical insurance of foreign citizens.

Students: We are not going to get the Mandatory medical insurance. It is under our contractor.

Group: INL-21-22(A)
