

## Чек лист

Date \_\_\_\_\_

Type of procedures: "Correct suture placement"

Student's full name \_\_\_\_\_

| No. | Stage  | Action   | Check mark                          |
|-----|--|--|-------------------------------------|
| 1.  | Preparation  | Use a sterile needle with suitable thread.                         | <input type="checkbox"/>            |
|     |  | Put on gloves  | <input checked="" type="checkbox"/> |
|     |  | Make sure the edges of the wound are aligned                       | <input type="checkbox"/>            |
| 2   | Basic Surgical Knot (Double) – for starting the suture |  | <input type="checkbox"/>            |
|     |  | Make the first turn of the thread around the tweezers or fingers   | <input type="checkbox"/>            |
|     |  | The second turn is tied in the opposite direction (cross)          | <input type="checkbox"/>            |
|     |  | Tighten the knot carefully without damaging the fabric.            | <input type="checkbox"/>            |
| 3   | Intermittent knot                                      | Tie the first knot, then cut the thread, leaving a short tail      | <input type="checkbox"/>            |
|     |  | Tie each subsequent knot separately on a new section of the wound. | <input type="checkbox"/>            |
| 4   | Mattress knot (for firmly closing tense tissue)        | Insert the needle parallel to the edges of the wound               | <input type="checkbox"/>            |
|     |  | Make a horizontal or vertical turn                                 | <input type="checkbox"/>            |
|     |  | Tie a knot on the surface of the fabric without damaging the edges | <input type="checkbox"/>            |
| 5   | Reliability control                                    | Check each node for tightness and reliability                      | <input type="checkbox"/>            |
|     |  | Make sure that the tissue is not compressed (no ischemia)          | <input type="checkbox"/>            |
|     |  | Trim off excess thread ends  | <input type="checkbox"/>            |
|     |  | Treat the seam with an antiseptic                                  | <input type="checkbox"/>            |
