## campus experience

1. In 2020, I joined the Youth Association of Chengdu Medical College and served as a key member of the health and elderly care volunteer service team. Together with team members, I completed the meeting tasks assigned by the school.

2. Participated in the clown doctor project practice organized by the school. In 2022, I carried out the project in Chengdu Medical College First Affiliated Hospital for several times, communicated with patients, analyzed the advantages and disadvantages of the activity and optimized it in time.

3. In 2023, I completed on-campus first aid training and became a certified emergency medical responder. 4. In 2021, I participated in the school's Benevolence and Innovation program, where I proposed a group research project on the medical applications of magnetohydrodynamic technology. 5. In 2022, I completed internships at Xindu District People's Hospital, KingMed Diagnostics, and the First Affiliated Hospital of Chengdu Medical College, gaining hands-on experience in laboratory workflows, quality control systems, and instrument operation.

6. During my internship at Ziyang Central Hospital, I diligently studied relevant professional knowledge and mastered the operation of routine laboratory instruments. I also had the opportunity to learn data processing and paper publication from my mentor.

7. Participated in the Medical Laboratory Academic Conference of Eight Cities in Southern Sichuan, organized by the Branch of Laboratory Physicians.

## [医]educational background

Chengdu Medical College, Medical Laboratory Technology, Undergraduate

## hobbies and interests
